

Security – Do not download raw data.

Security

Here is how to keep data safe

- **Encrypt** all devices used to access PHS data.
- **Do not share access** to your account.
- **Do not link**, overlay or publish a formula where someone else can back out cell sizes smaller than 10.
- **Do not download**, email, take screen shots of or write down any data or outputs or formulas that would result in cell sizes smaller than 10.

Security – keeping data safe

Define Download:

Includes but is not limited to:

- Downloading
- Emailing individual-level files
- Taking screenshots
- Copy/pasting raw data in an email
- Referring to a specific patient ID via email
